

THE BEST COLOR VARIETY FROM EUROPE

Color Classics combined: For the first time, Sikkens has joined Joinery Color Classics (JCC), the beautiful and most sought after color range in Europe, in an extensive collection. Discover the new and comprehensive design possibilities with high quality translucent and opaque coatings which perfectly match with each other.

STRONG QUALITIES ...

You have high demands? The Joinery Color Classics are ideal for exterior industrial surface treatment of wood (windows, doors, wooden facades, balconies, garden furniture). Due to the specific pigmentation of the primer and top coat, one achieves an especially high UV durability. The Joinery Color Classics naturally meet the high quality standards for the warranty provisions of Sikkens LONGLIFE.

... SIMPLY THE BEST!

Special feature: The Joinery Color Classics colors can be ordered throughout Europe – either by the wood name, for example "Teak" (T, C) or "Mahagoni" (T, C), or by reference to the new JCC-Code. The former hallmark (i. e. Classic-Code or pure number code) is adjusted in this collection by adding a uniform "J" in front of the number code. With this simple additional letter, you can differentiate between translucent (T = translucent) or opaque (C = covering) in the required color.

In this way, the order procedure is not only easy, but can be requested throughout Europe by architects, building owners, etc. as part of a standardised collection.

IT'S EASY TO ORDER THE JOINERY COLOR CLASSICS

EXAMPLE 1:

For pine wood constructions in translucent Teak, gloss level satin matt

- Impregnating base stain with Sikkens Cetol WP 567 BPD, mid and top coat with Sikkens Cetol WF 950:
- Color code the order of the base stain and top coat either "J085 T" or "Teak T"

EXAMPLE 2:

For leaf wood constructions in an opaque color Teak, gloss level satin matt

- Base stain with Sikkens Cetol WP 560, mid and top coat coat with Sikkens Rubbol WF 378:
- Color code for the order of the base stain either "J085 T" or "Teak T"
- Color code for the order of the top coat either with "J085 C" or "Teak C"

Our hint:

Use the translucent base stain color even for an opaque system! With this flexible procedure, you can minimise your product assortment and save material costs.

YOUR ADVANTAGES SUMMARISED

- The best of Europe's color variety
- Compatible with Sikkens LONGLIFE quality and warranty provisions
- Translucent colors with optimal UV-protection
- Opaque colors for extreme weathering
